Mathematical Biosciences

Volume 19

1974

an international journal

Contents:

BAYESTEH KASHEF AND RICHARD BELLMAN (Los Angeles, California)
Solution of the Partial Differential Equation
of the Hodgkin-Huxley Model Using Differential Quadrature 1

WILLIAM A. BEYER AND MYRON L. STEIN (Los Alamos, New Mexico),
TEMPLE F. SMITH (Marquette, Michigan), AND STANISLAW M.
ULAM (Boulder, Colorado)
A Molecular Sequence Metric and Evolutionary Trees 9

TOSIO KITAGAWA (Fukuoka, Japan)
Cell Space Approaches in Biomathematics 27

CHARLES J. MODE (Philadelphia, Pennsylvania)
Discrete Time Age-Dependent Branching Processes
in Relation to Stable Population Theory in Demography 73

W. A. LITTLE (Stanford, California)
The Existence of Persistent States in the Brain 101

PHIL DIAMOND (Brisbane, Australia)
The Stability of the Interaction Between
Entomophagous Parasites and Their Host 121

BIRGER JANSSON AND LASZLO RÉVÉSZ (Stockholm, Sweden)
Analysis of the Growth of Tumor Cell Populations 131

H. A. OTTEN (Leiden, The Netherlands)
Some Remarks on the Michaelis-Menten Kinetic Equations 155

R. J. BLOMER (München, Germany)
Decomposition of Compartment Transition Functions by
Means of the Pade-Approximation 163

K. S. CRUMP AND R. B. HOWE (Ruston, Louisiana)
Estimating the Age of a Bellman-Harris Branching Process 175

S. YA. ZASLAVSKY AND YE. I. SLAVUTSKY (Kiev, USSR)
Problem of Mapping Spreading and Prognostication of
Disease Course 185

ELIANE ABILLON (Gif-sur-Yvette, France)
The Extrapolation Number in the "m Targets-One Hit" Model 191

CHARLES J. MODE (Philadelphia, Pennsylvania)
A Discrete Time Stochastic Growth Process
for Human Populations Accomodating Marriages 201

Mathematical Biosciences

an international journal

Volume 19
Numbers 3/4
April, 1974

ELIANE ABILLON (Gif-sur-Yvette, France)
The Extrapolation Number in the "m Targets-One Hit" Model 191

CHARLES J. MODE (Philadelphia, Pennsylvania)
A Discrete Time Stochastic Growth Process
for Human Populations Accommodating Marriages 201

R. BELLMAN, B. KASHEF AND R. VASUDEVAN (Los Angeles, California)
The Inverse Problem of Estimating Heart Parameters From Cardiograms 221

R. WETTE, I. N. KATZ, AND E. Y. RODIN (St. Louis, Missouri)
Stochastic Processes for Solid Tumor Kinetics
I. Surface-Regulated Growth 231

J. RADCLIFFE (London, England)
The Effect of the Length of Incubation Period
on the Velocity of Propagation of an Epidemic Wave 257

BEAN SAN GOH (Kensington, N.S.W., Australia), GEORGE LEITMANN
(Berkeley, California), AND THOMAS L. VINCENT (Tuscon, Arizona)
Optimal Control of a Prey-Predator System 263

M. O'CALLAGHAN AND N. I. FISHER (Newtown, N.S.W., Australia)
A Stochastic Model for the Development
and Immunological Control
of a Class of Parasites of Sheep 287

FRED BRAUER (Madison, Wisconsin)
On the Populations of Competing Species 299

MARC RENDELL (Bethesda, Maryland)
Stochastic Dose Response 307

K. H. LIN (San Francisco, California) AND C. C. SHIR (San Jose, California)
A Numerical Model of Oxygen Uptake
in the Human Lung During a Respiratory Cycle 319

T. T. SOONG AND J. W. DOWDEE (Buffalo, New York)
Pharmacokinetics With Uncertainties In Rate Constants III: The Inverse Problem 343

H. HERING (Berlin, West Germany)
Limit Theorem for Critical Branching Diffusion Processes with Absorbing Barriers 355

G. M. TALLIS (Adelaide, South Australia) AND G. SARFATY (Melbourne, Australia)
On the Distribution of the Time to Reporting Cancers
with Application to Breast Cancer in Women 371

Mathematical Biosciences

an international journal

Mathematical Biosciences

Volume 20
1974

an international journal

Contents:

G. MATIOLI AND R. VASUDEVAN (Los Angeles, California)
Microdiffusive and Competitive Modes
of the Decaying Hemopoietic Stem Cell 1

JOHN A. JACQUEZ (Ann Arbor, Michigan) AND STANLEY G. SCHULTZ (Pittsburgh, Pennsylvania)
A General Relation Between Membrane Potential, Ion Activities,
and Pump Fluxes for Symmetric Cells in a Steady State 19

GEORGE H. PIMBLEY, JR. (Los Alamos, New Mexico)
Periodic Solutions of Predator-Prey Equations Simulating an Immune Response. I. 27

N. MACDONALD (Glasgow, Scotland)
Statistical Aspects of a Set of Coupled Rate Equations 53

DANIEL L. GILBERT (Bethesda, Maryland)
Potential and Time Constant Effects
in the Fast Ramp Voltage Clamp 67

WILLIAM F. PICKARD (St. Louis, Missouri)
Electrotonus on a Nonlinear Dendrite 75

BARBARA ABRAHAM-SHRAUNER (St. Louis, Missouri)
Models for Electrostatic Interactions Between Protein Molecules
and Surfaces Involved in Blood Clot Formation 85

ROBERT W. POOLE (Urbana, Illinois)
The Use of Simultaneous Linear Regression Equations
as Empirical Models of Community Structure 105

A. M. MATHAI (Montreal, Canada) AND T. ANTHONY DAVIS (Calcutta, India)
Constructing the Sunflower Head 117

ALEX N. BEAVERS, JR. AND EUGENE D. DENMAN (Houston, Texas)
A New Solution Method for Quadratic Matrix Equations 135

P. HAGANDER AND L. JOHANSSON (Lund, Sweden)
Incompatibility Alleles; Characteristics of a l-Locus System 145

BERNARD D. COLEMAN (Pittsburgh, Pennsylvania) AND GEORGE H. RENNINGER (Guelph, Ontario)
On the Integral Equations of the Linear Theory
of Recurrent Lateral Interaction in Vision 155

STEPHEN H. LEVINE (Albany, New York)
Optimal Allocation of Time in Resource Harvesting 171

D. G. BOURGIN (Houston, Texas)
A Simple Model for Virus-Bacteria Interaction 179

GERALD ROSEN (Philadelphia, Pennsylvania)
On The Propagation Theory for Bands of Chemotactic Bacteria 185

MICHAEL R. CLARK AND LAWRENCE STARK (Berkeley, California)
Control of Human Eye Movements:
I. Modelling of Extraocular Muscle 191

MICHAEL R. CLARK AND LAWRENCE STARK (Berkeley, California)
Control of Human Eye Movements:
II. A Model for the Extraocular Plant Mechanism 213

MICHAEL R. CLARK AND LAWRENCE STARK (Berkeley, California)
Control of Human Eye Movements:
III. Dynamic Characteristics of the Eye Tracking Mechanism 239

CHARLES J. MODE AND GARY S. LITTMAN (Philadelphia, Pennsylvania)
Applications of Computerized Stochastic Models of
Human Reproduction and Population Growth in
Family Planning Evaluation 267

MOSTAFA A. ABDELKADER (Alexandria, Egypt)
Exact Solutions of Lotka-Volterra Equations 293

R. BELLMAN, S. UENO AND R. VASUDEVAN (Los Angeles, California)
Invariant Imbedding and Radiation Dosimetry:
VIII. Reflection Function from a Double Layer—Finite Order Functions 299

R. BELLMAN, A. L. FYMAT, S. UENO,
AND R. VASUDEVAN (Los Angeles, California)
Invariant Imbedding and Radiation Dosimetry:
IX. Inverse Problem of Determining a Plane Source
in a Finite Isotropically Scattering Target Slab 315

M. E. WISE (Leiden, The Netherlands)
Interpreting Both Short- and Long-Term Power Laws
in Physiological Clearance Curves 327

A. N. BEAVERS, JR. AND EUGENE D. DENMAN (Houston, Texas)
Asymptotic Solutions to the Matrix Riccati Equation 339

LLOYD DEMETRIUS (Providence, Rhode Island)
Multiplicative Processes—II 345

ERNEST M. STOKELY, L. R. NARDIZZI, R. W. PARKEY,
AND F. J. BONTE (Dallas, Texas)
A Heterogeneous Tissue Model for Measurement of
Regional Blood Perfusion in the Myocardium
Using Inert Gas Isotopes 359

T. K. LIN AND J. E. DUTT (Chicago, Illinois)
A New Method for the Analysis of Sums of Exponential Decay Curves 381

Subject and Author Indexes to Vols. 19–21 (1974)
appear at the end of Vol. 21

Mathematical Biosciences

Volume 21

1974

an international journal

Contents:

R. BELLMAN (Los Angeles, California)
AND H. SUGIYAMA AND B. KASHEF (Los Angeles, California)
Applications of Dynamic Programming and Scan-Rescan Processes
To Nuclear Medicine and Tumor Detection 1

WILLIAM J. JUSKO (Buffalo, New York)
Interpretation of Cell Proliferation Curves
Using a Two-Compartment Cell Model 31

PAUL CULL AND ANDREW VOGT (Corvallis, Oregon)
The Periodic Limit for the Leslie Model 39

W. J. VAN DE LINDT (Gaithersburg, Maryland)
Numerical Modeling of the Mechanics of the Cochlea 55

LORINDA C. HU AND CHIA-REN HU (Los Angeles, California)
Identification of Rate Constants
by Differential Quadrature
in Partly Measurable Compartmental Models 71

F. MARTORANA (Pisa, Italy) AND A. MORO (Florence, Italy)
On the Kinetics of Enzyme Amplifier Systems
with Negative Feedback 77

S. W. HINKLEY (Washington, D.C.) AND CHRIS P. TSOKOS (Tampa, Florida)
A Stochastic Model for Chemical Equilibrium 85

IRENE A. CHOW (Brooklyn, New York)
A Stochastic Approach to Survival Problem
With Concomitant Variables and Application
To Acute Leukemia Patients 103

PAUL WALTMAN (Iowa City, Iowa)

A Threshold Criterion for the Spread of
An Infection in a Two Population Model 119

COLIN J. THOMPSON AND JOHN L. MCBRIDE (Melbourne, Australia)
On Eigen's Theory of the Self-Organization of
Matter and the Evolution of Biological Macromolecules 127

A. N. BEAVERS, JR. AND E. D. DENMAN (Houston, Texas)
A New Similarity Transformation Method for
Eigenvalues and Eigenvectors 143

A. Meir and J. W. Moon (Edmonton, Canada)
Cutting Down Recursive Trees 173

D. Stirzaker (Oxford, England)
A Singular Perturbation Analysis
for Models of Schistosomiasis 183

Gordon L. Shaw (Irvine, California) and R. Vasudevan (Madras, India)
Persistent States of Neural Networks
and the Random Nature of Synaptic Transmission 207

William E. Kastenberg and Richard A. Ziskind (Los Angeles, California)
On the Stability of Diffusion Systems with Chemical Reactions 219

Alejandro B. Engel (Amherst, New York)
Nondirectly Perturbable Systems 237

David William Young (Birmingham, England)
Logical Necessity and Sufficiency in Medicine 241

George H. Pimbley, Jr. (Los Alamos, New Mexico)
Periodic Solutions of Predator-Prey Equations
Simulating an Immune Response, II 251

Paul L. Nunez (La Jolla, California)
The Brain Wave Equation: A Model for the EEG 279

John L. Stephenson (Bethesda, Maryland)
Free-Energy Balance in Renal Counterflow Systems 299

R. Wette, I. N. Katz, and E. Y. Rodin (Saint Louis, Missouri)
Stochastic Processes for Solid Tumor Kinetics
II. Diffusion-Regulated Growth 311

H. Melvin Lieberstein (Newcastle, N.S.W.)
and John A. Rickard (Melbourne, Victoria)
The Basilar Membrane as a Set of
Uniformly Loaded Circular Annular Plates
Clamped on Both Edges 339

Gerald Rosen (Philadelphia, Pennsylvania)
Necessary Condition for the Existence of Periodic Solutions to
Systems of Reaction-Diffusion Equations 345

Vasudevan, R., *19*, 221; *20*, 1, 299, 315; *21*, 173
Vincent, T. L., *19*, 263
Vogt, A., *21*, 39

Waltman, P., *21*, 129
Wette, R., *19*, 231; *21*, 305
Wise, M. E., *20*, 327

Young, D. W., *21*, 163

Zaslavsky, S. Ya., *19*, 185
Ziskind, R. A., *21*, 223

Bacteria, on propagation theory for bands of chemotactic, *20*, 185
Bellman-Harris branching process, estimating the age of, *19*, 175
Brain wave equation: a model for the EEG, *21*, 273
Branching diffusion processes with absorbing barriers, limit theorem for critical, *19*, 355
Breast cancer in women, on the distribution of the time to reporting cancers with application to, *19*, 371

Cell proliferation curves using a two-compartment cell model, interpretation of, *21*, 31
Cell space approaches in Biomathematics, *19*, 27
Cochlea, numerical modeling of the mechanics of, *21*, 55
Community structure, the use of simultaneous linear regression equations as empirical models of, *20*, 105
Compartment transition functions by means of Pade-approximation, decomposition of, *19*, 163
Competing species, on the populations of, *19*, 299
Coupled rate equations, statistical aspects of a set of, *20*, 53

Dendrite, electrotonus on a nonlinear, *21*, 71
Diffusion systems with chemical reactions, on the stability of, *21*, 223
Disease course, problem of mapping spreading and prognostication of, *19*, 185
Dose response, stochastic, *19*, 307

Eigen's theory of the self-organization of matter and the evolution of biological macromolecules, on, *21*, 137
Eigenvalues and eigenvectors, a new similarity transformation method for, *21*, 185
Electrostatic interactions between protein molecules and surfaces involved in blood clot formation, models for, *20*, 85
Electrotonus on a nonlinear dendrite, *20*, 75
Entomophagous parasites and their host, the stability of the interaction between, *19*, 121
Enzyme amplifier systems with negative feedback, on the kinetics of, *21*, 87
Epidemic wave, effect of length of incubation period on velocity of propagation, *19*, 257
Equilibrium, a stochastic model for chemical, *21*, 95
Exponential decay curves, a new method for the analysis of sums of, *20*, 381
Eye movements, control of human: I. Modelling of extaocular muscle, *20*, 191
Eye movements, control of human: II. A model for the extraocular plant mechanism, *20*, 213
Eye movements, control of human: III. Dynamic characteristics of the eye tracking mechanism, *20*, 239

Growth process for human populations accommodating marriages, discrete time stochastic, *19*, 201

Heart parameters from cardiograms, the inverse problem of estimating, *19*, 221
Hodgkin-Huxley model, solution of the partial differential equation using differential quadrature, *19*, 1

Immune response, I., periodic solutions of predator-prey equations simulating, *20*, 27
Immune response, II., periodic solutions of predator-prey equations simulating, *21*, 245
Inert gas isotopes, a heterogeneous tissue model for measurement of regional blood perfusion in the myocardium using, *20*, 359
Infection in a two population model, a threshold criterion for the spread of, *21*, 129
Invariant imbedding and radiation dosimetry: VIII. Reflection function from a

double layer-finite order functions, *20*, 299
Invariant imbedding and radiation dosimetry: IX. Inverse problem of determining a plane source in a finite isotropically scattering target slab, *20*, 315

Leslie model, the periodic limit for, *21*, 39
Leukemia patients, a stochastic approach to survival problem with concomitant variables and application to acute, *21*, 113
1-Locus system, characteristics of; incompatibility alleles, *20*, 145
Logical necessity and sufficiency in medicine, *21*, 163
Lotka-Volterra equations, exact solutions of, *20*, 293
Lung during a respiratory cycle, a numerical model of oxygen uptake in the human, *19*, 319

Matrix Riccati equation, asymptotic solutions to, *20*, 339
Membrane potential, ion activities and pump fluxes for symmetric cells in a steady state, a general relation between, *20*, 19
Michaelis-Menten kinetic equations, some remarks on, *19*, 155
Molecular sequence metric and evolutionary trees, *19*, 9
"m Targets-One Hit" model, the extrapolation number in, *19*, 191
Multiplicative process—II, *20*, 345

Neural networks, persistent states of, and the random nature of synaptic transmission, *21*, 173

Parasites of sheep, a stochastic model for the development and immunological control of a class of, *19*, 287
Persistent states in the brain, the existence of, *19*, 101
Pharmacokinetics, analysis and identification of stochastic compartment models: implication for cancer chemotherapy, *21*, 333
Pharmacokinetics with uncertainties in rate constants III: the inverse problem, *19*, 343
Physiological clearance curves, interpreting both short- and long-term power laws in, *20*, 327
Prey-predator system, optimal control of, *19*, 263

Quadratic matrix equations, a new solution method for, *20*, 135

Rate constants, identification of, by differential quadrature in partly measurable compartmental models, *21*, 81
Recursive trees, cutting down, *21*, 153
Renal counterflow systems, free-energy in, *21*, 293
Reproduction and population growth in family palnning evaluation, applications of computerized stochastic models of human, *20*, 267

Schistosomiasis, a singular perturbation analysis for models of, *21*, 213
Stable population theory in demography, discrete time age-dependent branching processes in relation to, *19*, 73
Stem cell, microdiffusive and competitive modes of the decaying hemopoietic, *20*, 1
Sunflower head, constructing the, *20*, 117
Systems, nondirectly perturbable, *21*, 241

Time in resource harvesting, optimal allocation of, *20*, 171
Tumor cell populations, analysis of the growth of, *19*, 131
Tumor detection, applications of dynamic programming and scan-rescan processes to nuclear medicine and, *21*, 1
Tumor kinetics, stochastic processes for solid, I. surface-regulated growth, *19*, 231
Tumor kinetics, stochastic processes for solid, II. Diffusion-regulated growth, *21*, 305

Virus-bacteria interaction, a simple model for, *20*, 179
Vision, on the integral equations of the linear theory of recurrent lateral interaction in, *20*, 155
Voltage clamp, potential and time constant effects in the fast ramp, *20*, 67
